JavaScript, TypeScript, Java

SQL Server, MySQL, PostgreSQL, MongoDB, Firebase

Git, GitHub, Git flow, Docker, Postman, VSCode, Visual Studio, Android Studio, Figma

OBJECTIVE

As a final year student majoring in information technology, I always aspire to learn and develop myself in a professional environment. With a high spirit of self-study, good adaptability and ability to withstand pressure at work, I hope to apply my programming knowledge to contribute to the success of the project and the company.

WORK EXPERIENCE

Frontend Developer Intern **09/2025 - Current**

XEPO TECHNOLOGY JOINT STOCK COMPANY

- Participate in meetings, internal discussions and sprint meetings according to the Agile model, and support writing technical documents for the team and using Jira to manage tasks.
- Develop and maintain the company's website system, using Vue.js + Nuxt.js (TypeScript) in the frontend and Nest.js + MongoDB in the backend.
- Design and implement RESTful APIs with JWT authentication, role-based authorization.

PROJECT

Full-stack Developer **08/2025 - 09/2025**

Online Dating Application

Developed a feature-rich dating application, focusing on usability and modern mobile experience.

- Built the frontend with React Native and Expo, while designing a scalable backend using NodeJS, Express, and PostgreSQL for data management.
- Implemented essential features: user registration/login, real-time chat system, account upgrade options, intelligent matching system, and user management.
